

Ser NIC-05/2389  
09 OCT 1974

From: Commander, Naval Intelligence Command  
To: Chief of Naval Reserve

Subj: Reserve Support for the Naval Investigative  
Service

Encl: (1) Schedule of Port Security Vulnerability Surveys

1. The Naval Investigative Service is engaged in a series of Port Security Vulnerability Surveys. The ports to be surveyed and the dates tentatively planned for the surveys are listed in enclosure (1).

2. The Director, Naval Investigative Service has requested that personnel from NIS-designated reserve units be assigned ACDUTRA to support this survey program. It is envisaged that these personnel (preferably LCDR and senior) will participate actively with Naval Investigative Service Headquarters (NISHQ) personnel in the planning and conduct of the surveys. Following the completion of each survey the reservist involved would supervise the preparation of the final report by his parent unit.

3. In time, as NIS-dedicated reserve units gain experience in the conduct of port security surveys and the compilation of follow-on reports, reserve personnel would be able to schedule and conduct studies without the participation of NISHQ personnel and would play an increasingly important role in the maintenance of the program.

4. It is requested that the Director of Naval Reserve Intelligence Program be given the responsibility of assigning appropriate reserve intelligence units to provide ACDUTRA officers for each of the listed surveys. In addition the units should be tasked to compile the final reports within two months of the survey completion date and to prepare their personnel to assume the responsibilities listed in paragraph 3. NIS action officer for this project is CDR Thomas A. BROOKS, USN, who can be contacted by calling autovon 221-9116/7 or by commercial telephone 202-325-9116/7.

5. This project provides an excellent opportunity for Reserve Intelligence Units to demonstrate their capabilities and value to the operating forces.
